World class technology from BEST Tiles and Terrazzo.

BEST Terrazzo Tiles have the ability to create a wide range of striking and beautiful effects by combining natural aggregates whilst utilizing the very latest advances in production technologies.

BEST Terrazzo Tiles are a manufactured composite of natural stone chippings and marble dust set into a cement matrix mixed with colour oxides.

All marbles, granites and natural aggregates used are carefully selected by BEST, carefully controlling the aggregate size to achieve the greatest clarity and richness of colour in the final tile.

The secret to the fantastic BEST Terrazzo Tile range lies in the multi-million dollar new production facility imported from Europe. This world-class technology makes this plant the only one of its type in Australia.

A variety of designs and effects can be created in addition to BEST's standard Terrazzo Tile range. Unlike imported terrazzo tiles which exclude any design input, BEST Tiles & Terrazzo's exclusive design.it service offers designers and architects an opportunity to select their own mixture of marbles, aggregates and background colour to create a truly unique and original floor. This allows BEST Terrazzo Tiles to become an integral part of the overall design scheme.

The strict production control standards at BEST are quality assured to ISO 9002 ensuring that the complete BEST Terrazzo Tile range is manufactured to the highest possible standards.

Available Australia-wide, if flooring is on your agenda call BEST Tiles & Terrazzo on (08) 8262 6614.
